Italian

PROFESSIONAL SUMMARY

My professional role is in the IT project management and I have several years of experience in the field.

I acquired the ability to develop projects suited to the needs of the company, so as to analyze and therefore optimize existing processes. My responsibility is successfully executing organizations' specific IT goals: in particular, I deal with activities such as planning, organization and management of projects on IT systems.

My educational background allows me to apply these skills not only in IT systems of private companies but also in health information systems and in research laboratories in the bioinformatics field.
